Jakarta Timur, Jakarta | [Portfolio](#) | [LinkedIn](#) | +6285828949439 | bsultanrama@gmail.com

SUMMARY

Certified in Full Stack Development from Eduwork, with hands-on experience at PT Baracipta Esa Engineering. Skilled in Node.js, React, Express, and MongoDB, delivering impactful and scalable web solutions. Adept at problem-solving, fostering collaboration, and driving the development of user-centric applications. Proven ability to transform concepts into efficient digital products, combining technical expertise with a proactive and detail-oriented approach.

WORK EXPERIENCE

EDUWORK

Online

Full Stack Developer - Internship

Aug 2024 – Nov 2024

- Designed and developed RESTful APIs using Express.js, enabling robust and efficient backend operations.
- Developed and maintained a full-featured POS system application, enabling seamless user interactions by integrating RESTful APIs, JWT authentication, and cloud-based databases.
- Developed three web projects within just 2 weeks and met all functional requirements, by applying Agile development principles.
- Created dynamic, user-friendly web interfaces with React.js, focusing on responsiveness and modern design principles.
- Built full-stack applications utilizing the MERN stack (MongoDB, Express, React, Node.js), ensuring seamless integration between backend and frontend.
- Conducted unit testing and debugging to ensure reliability and maintainability of applications.

KELURAHAN GILANGHARJO

Yogyakarta

IT Support - Freelance

Mar 2023 – Sep 2024

- Designed and implemented a backend system for an administration service website using CodeIgniter, significantly improving the efficiency of administrative workflows.
- Maintained and optimized existing software systems to enhance performance, resolve bugs, and ensure seamless user experiences.
- Conducted routine backups of critical data, ensuring data integrity and disaster recovery readiness.
- Collaborated closely with sub-district officers to conceptualize and develop a new web feature, tailoring solutions to meet the unique needs of local government operations.
- Integrated user feedback to improve system usability, resulting in a 25% increase in user satisfaction and engagement.

PT BARACIPTA ESA ENGINEERING

Full Stack Developer - Internship

Yogyakarta

Aug 2022 – Dec 2022

- Built a comprehensive monolithic web application using CodeIgniter, ensuring high performance and scalability.
- Collaborated in the design and creation of Entity-Relationship Diagrams (ERD) to align with the specifications and requirements of the web application.
- Designed and implemented a RESTful API using CodeIgniter, seamlessly integrated with a MySQL database to enhance system efficiency and data management.
- Developed and maintained API documentation using Postman, leading to a 20% improvement in developer productivity by streamlining onboarding and collaboration.

CERTIFICATION & BOOTCAMP

EDUWORK

Online

Programmer Full Stack MERN

Aug 2024 – Nov 2024

- Completed courses in ExpressJS, ReactJS (Javascript Framework) within three months.
- Learned to design and build RESTful API to enable scalable and robust backend operations, using Express.js and Node.js in one week.
- Implemented CRUD operations and user authentication, enhancing application security and functionality by 80% using technologies like JWT and bcrypt.
- Worked with Git and GitHub for version control and collaboration, adhering to clean code and Agile development practices.
- Gained in-depth knowledge of database design and management to optimize data handling and improve application performance using MongoDB.

UDEMY

Online

Node.js, Express, MongoDB & More: The Complete Bootcamp

Jun 2024 – Jul 2024

- Developed high-performance Node.js applications using event-driven architecture and asynchronous programming to handle real-time data processing.
- Built scalable and efficient RESTful APIs with Express.js, implementing advanced features like filtering, sorting, and pagination.
- Managed complex data queries and integrated NoSQL databases into full-stack applications with MongoDB and Mongoose.
- Implemented advanced security features, including bcrypt for password hashing and JWT for token-based authentication.
- Optimized user experience by implementing server-side rendering with Pug templates to generate dynamic HTML content.

UDEMY

Online

The Complete 2024 Web Development Bootcamp

May 2024 – Jun 2024

- Developed web applications from scratch, incorporating both frontend and backend development techniques using HTML, CSS, JavaScript, React, Node.js, and PostgreSQL.
- Gained hands-on experience with Node.js, Express, and PostgreSQL for backend development, enabling the creation of dynamic, secure, and scalable web applications.
- Developed responsive, interactive websites with React.js, utilizing React Hooks and API integration to create fast, user-friendly front-end interfaces.
- Built decentralized applications (DApps) and implemented Web3 and blockchain technologies to explore blockchain development and create decentralized applications.
- Implemented version control and deployed projects using Git, GitHub, and GitHub Pages to manage collaboration and ensure seamless deployment.

EDUCATION

AHMAD DAHLAN UNIVERSITY

Yogyakarta

Bachelor Degree (S-1) - Informatics

Aug 2019 – Aug 2023

GPA: 3.79 / 4.00

- Acquired in-depth knowledge of Web Development, Data Structures, and Optimization Techniques.
- Create a website that generates computer specification recommendations based on consumer budgets using binary particle swarm optimization algorithms.
- Proficient in web development using modern technologies and frameworks, with a deep understanding of backend and frontend design, and database management.

SKILLS, INTERESTS, & LANGUAGES

Technical Skills : Node.js | Express.js | React.js | Vue.js | PHP | Laravel | CodeIgniter | jQuery | Bootstrap | TailwindCSS | MongoDB | MySQL | PostgreSQL | RESTful API Development | Git/Github |

Soft Skills : Problem Solving | Time Management | Troubleshooting | Teamwork | Communication

Interests: Web Development | Software Development | Full Stack Developer | Backend Developer

Language : Bahasa Indonesia (Native) | English (Intermediate)

PROJECTS

POS System

Oct 2024 - Nov 2024

Details : A web-based point of sale (POS) system for managing sales and inventory.

Tools : MongoDB, Express Js, React Js, Node Js, TailwindCSS, Vercel

Link : <https://github.com/burhanusr/mern-pos-system>

Demo : <https://mern-pos-system-frontend.vercel.app>

Natours*Jun 2024 - Jul 2024*

Details : Online tour booking web app

Tools : MongoDB, Express Js, Pug, Node Js, Midtrans, Vercel

Link : <https://github.com/burhanusr/natours>

Demo : <https://natours-three-rho.vercel.app>

e-Gilang*Mar 2023 - Jun 2023*

Details : Administration service website

Tools : PHP, CodeIgniter, Bootstrap

Demo : <https://egilang.gilangharjo.id>

Stufast Learning Center*Aug 2022 - Dec 2022*

Details : Online learning and teaching marketplace

Tools : PHP, CodeIgniter, MySQL, Bootstrap

Demo : <https://stufast.id/>

REFERENCE

Name : Muhammad Zakuan

Company : Eduwork

Position : Mentor - Programmer Full Stack MERN
